

Offline Fix for vlc player

Installation

1. Click on the link to download the update file from <https://ld.iitb.ac.in/sites/default/files/update-3-offline.run.zip> to an **external pendrive or sdcard**
2. Copy **update-3-offline.run.zip** file from the pendrive to **/home/user** directory of the target laptop
3. Once you copy the zip file on the target laptop then open the terminal

4. Unzip the **update-3-offline.run.zip** using unzip command

```
>  
user@debian:~$ unzip update-3-offline.run.zip  
Archive:  update-3-offline.run.zip  
  inflating: update-3-offline.run  
user@debian:~$ █
```

5. Make the **update-3-offline.run** file executable as shown below

```
>  
user@debian:~$ chmod +x update-3-offline.run
```

6. Execute the **update-3-offline.run** file from the terminal and enter the password when prompted, the default password is *user*

```
>  
user@debian:~$ ./update-3-offline.run  
Creating directory /tmp/payload  
Verifying archive integrity... All good.  
Uncompressing update 3 offline  
[sudo] password for user:
```

7. Once you enter the correct password the update process should finish in a few seconds
